

Order shows as ‘Delivered’ but Not Received – Frequently Asked Questions

Guidance on reporting the order that shows delivered but not received. If your order shows as delivered but you have not received it, you can 'Raise a query' in the app.

Possible Reasons (why the order shows as 'delivered')

If your order consisted of multiple items and only a few were delivered to you, it's possible that the other items in your order were dispatched in another shipment.

Your family members/ neighbors or reception might have collected the package on your behalf.
